AOL are incredible! Purchasing Netscape after the media had already reported the MS vs Netscape saga with the clear cut runner being IE as a matter of consumer choice! Internet Explorer is streets ahead in technology, speed, you name it, it is the best browser ever.

Do you honestly beleive any courtroom decision will stop me using Internet Explorer. Do you think i wanted Netscape? Is Linux harming Microsoft - its Free!!!!!!1 What is the U.S.A going to do about that? What about Sun giving away Java? What about the bombardment of AOL cds through my letterbox every single MONTH!!!!

My only thoughts are that its about time the US government took a stand against companies targeting microsoft purely to obtain quick financial gain from decisions they took which were inferior. AOL should be split up. How can you allow such a vast company to control the media channels by using litigation instead of competitive practices.

Shame on you and on the nine states with their obvious corruption led decision making proce\$\$\$. Microsoft started as 2 men, hard work, brains and success. AOL was started by a bubble- and its about time it was burst.
